

Cape series

Designed by BOLIA Design Team, Denmark

The Cape Parasol features a modern design with a large round canopy that stands out to any patio or garden. Its innovative side leg allows for maximum space efficiency, letting you arrange furniture without the hindrance of a centre pole. With an adjustable canopy angle, you can easily adapt to the sun's position, ensuring optimal shade throughout the day. Designed with optimal air circulation in mind, it allows a gentle breeze to flow through, keeping your area comfortable. Included is a protective cover, and with its durable aluminium frame, the Cape parasol is lightweight yet resilient, making it perfect for long-lasting use season after season.

Meet the designer

We believe that good design is not only about what you see but also about how it is created and the emotions it stirs. Rooted in Scandinavian design traditions, a liberal view of human nature and respect for nature and people, we always stand by our core values – also in our designs. We love functional design, natural materials, beautiful rooms, craftsmanship, durability and substance. Design that is tailored specifically for you and made to last for years.
