Rund

Designed by Per Weiss

Introduction

As consumers, we are all obligated to reevaluate our consumption habits. Our collective willingness to prioritize the purchase of products that we want to keep over time is crucial, as it is the most effective way to minimize resource consumption and pollution.

As a supplier of upholstered furniture, we are obligated to design and develop products with a long-life cycle in mind. At the same time, materials must be selected and designs developed with sustainability, disassembly, and recirculation in mind.

Rund is designed to honor the above principles without compromising functionality, comfort, quality, or aesthetics.

Sustainability in focus

We select materials and develop designs with sustainability, disassembly, and recirculation in mind.

FSC®-certified

In all of our products, we use FSC®-certified wood - the mark of responsible forestry.

Detachable covers

All our products have detachable covers for easy maintenance.

Prioritizing recycled materials

Our fabrics are all made from or partly made from recycled materials.

OEKO-TEX®

All our fabrics and foam are OEKO-TEX® certified. OEKO-TEX® is one of the world's best-known labels for textiles tested for harmful substances to ensure customer confidence and high product safety.

10 YEAR Warranty on frames

We offer a 10-year warranty on our frames, as we want to make sure that all our products have a prolonged lifespan.

Optimized for transport

Our designs and packaging are optimized to ensure minimized CO₂ emissions in relation to transport and storage.

The first principal criteria to meet when designing and producing a meaningful sustainable product is to ensure that the product will have a degree of uniqueness, a convincing and attractive aesthetic and functional profile.

In terms of build, style and comfort, Rund is designed to respect the above.

Rund is a comfortable and practical sofa equipped with removable, washable covers. The design also makes it possible to easily replace individual parts in case they are damaged, or you just want to change the look by replacing the color of the cover or choice of fabric. This is an essential part of the design as it prolongs longevity of the sofa - in the interest of your economy and consumption of resources.

Rund's character is defined by the distinctive and comfortable rounded arm and back. The flexible, modular design will allow you to shape the sofa to your living room, your needs and seating preferences.

Rund has been designed to be comfortable without the use of cushions, but to be able to adjust the sitting comfort and adapt it to a given situation and body structure, we offer a variety of cushions to form the preferred support.

Give back to Nature

In addition to using FSC®-certified wood, we contribute to the balance of the global ecosystem by planting more than 10.000 trees every year to compensate for our consumption of wood.

Upholstery parts

Sustainability profile

Rund is designed for a long life cycle, which is one of the primary intentions of our design philosophy.

- Strong and durable components in a design optimized for easy maintenance.
- All parts can be individually renewed if worn out or in case of damaging accidents.
- The detachable, washable covers are fitted with velcro that enable quick removal and precise reassembly, ensuring that the sofa remains presentable over time.
- We offer a 10-year warranty on our frames.

Optimized for transportation

The flat package design ensures minimized CO₂ emissions in relation to transport and storage, as it reduces the total volume of the items. Smaller packages also mean more convenient handling and thus less risk of damage during transport, as well as it makes it easier to install a sofa in, for instance, compact apartment buildings.

Materials

All materials are carefully selected in respect of overall quality and sustainability profile of the product.

- Which materials do we have available?
- How is it produced and with which environmental impact?
- Can the material be reused or upcycled?
- Which materials meet our expectations in terms of aesthetics, comfort, and durability?

Disassembly, recycling & waste management

The sofa is designed as individual components, which allow for separation of the sofa to ensure materials can be sorted into recyclable parts and waste.
