Choreography of Contrasts

Embracing the dialogue between opposites, this collection orchestrates a dance between utility and decoration, restraint and imagination. With a fusion of artistry and design, each piece encapsulates the quintessential elements that define our brand: aesthetics, authenticity and distinction in both form and function. Rooted in the celebration of pure, enduring materials and the craft that shapes them, traditional artisanship harmonises with contemporary design to bridge hand sculpted forms with casted metal. Clean lines find balance with voluminous contours, and time-honoured classics intertwine with the modern.

This season's pieces boast sleek silhouettes set against dark woods, a bold fusion that evokes new expressions. Matte textures converse with high-gloss finishes, while raw, unrefined beauty coexists with polished sophistication. The interplay of soft and solid forms a symphony of design. Within these contrasting harmonies lies an enduring allure.

With textures that invite touch, the marriage of organic shapes with masculine lines inspired by brutalism creates an intriguing tension. Choreography of Contrasts beckons you to immerse yourself in the interplay of textures, the symphony of materials and the poetry of design, inviting you to discover beauty in the juxtaposition of the unexpected.

Trace Vase

The name 'Trace' aptly describes the hand painted line that gracefully adorns the body of this vase. Resembling a meandering path, the line creates a captivating graphic imagery that beautifully contrasts the vase's curvaceous form. The handles seamlessly extend from the path, infusing the line with a sense of movement as it gracefully transitions into a three-dimensional shape. The generous size of the vase makes it ideal for making a bold statement as a floor vase or for showcasing flowers on a tabletop.
