CALMING TO THE EYE

Autumn is approaching, as is our urge to surround ourselves with soft furniture and textiles with warmth and comfort. To enhance the light tones, we also embrace the very dark tones, creating contrast and making the light colors appear more clearly.

Perfect imperfection in balance

Create a harmonious expression by styling different designs together: The contrasts of delicate glassware and more rustic materials like wood and dark ceramics add a fragile and elegant dimension to White Spaces.

alluring oceanic vibes

Bring the blue shades of the sea into the table setting. Inspired by captivating oceanic hues, the Pippine and Calen tableware series are like a piece of nature that welcomes us when we gather around the table.

THE BEAUTY IN NATURE
everlasting marble

WE CAN'T GET ENOUGH OF MARBLE! The popular material is beautiful, raw, and completely unique - no two pieces are exactly alike. We owe it to nature to love the beauty of what it has created, even if it is not perfect. This appreciation encourages us to find beauty in all unique materials of nature and marble is a perfect example of that.
