PC Portable Lamp New Colours

Pierre Charpin's PC Portable Lamp is a refined and portable freestanding lamp for indoor and outdoor use. Constructed in robust plastic and featuring a matte scratch- and water-resistant finish, its battery-powered design gives the freedom and flexibility to move it anywhere. The light source is hidden from view by a polycarbonate diffuser, available with both downlight and ambient output options, depending on the desired use. The PC Portable Lamps are available in several mono-colour designs or a selection of playful colour combinations, making them ideal for table lighting in numerous domestic environments, as well as at cafés, restaurants, and other public areas.
