CARE GUIDE — METALS

HOW TO CLEAN / POLISH

BRASS PLATED STEEL / CHROME PLATED STEEL

Make sure the metal is clean for dust and dirt on all surfaces before you begin polishing. Then apply an adequate amount of metal polish for brass- and chrome plated steel with a soft and dry cotton cloth to the item. Use a soft & dry cloth to polish the surface before the polish has dried.

(Make sure to read the instructions on the metal polish for specific guidance)

POWDER COATED STEEL

To get rid of dirt and dust, mix a mild detergent with warm water. Dip a lint free cloth into the water & wipe the item down with the cloth. If necessary, wipe the item dry with a soft dry cloth.

(Avoid scraping or rubbing the powder coating with an abrasive cloth that could damage or remove the coating from the surface)
