

Design House Stockholm — Est. 1992

ARCO /CHUCK MACK

→

The series was born in 2015 from an idea with classic trestles, which have played an important role in Design House Stockholm's development of the Arco tables. It started with a desk, which then inspired a dining table, leading to these new additions to the family. The Arco series is now complete with practical tables sporting high or low trestle legs. The idea is simple and functional, building on Chuck Mack's development of traditional carpenters trestles used by carpenters when adjusting the height of their working tables.

The tables are fitted with exceptional legs that can bear heavy weights in the same way as carpenter trestles. Just like their predecessors, the new models are easy to place and serve as neat little tables for your displays, plants, as a desk, or whatever you choose to use them for.

ARCO COLLECTION

→

Design House Stockholm is the publishing house for Scandinavian design. With timeless charisma and a level of quality that outlives fleeting trends, the collection represents the best of contemporary Scandinavian design. Since its beginnings in the early 90s, Design House Stockholm has created a network of around seventy designers, and works in the same manner as a book publisher works with its authors; developing and refining each designer's idea before final production. Its hub is the head office in Stockholm, one floor below the famous Gondolen restaurant with views over Stockholm's inlet and city centre.

Rather than name-dropping, Design House Stockholm focuses on ideas – each product must bring something new to its category. The definition of Scandinavian design has nothing to do with geographical location or nationality, the term is instead intended to describe a philosophical aesthetic and an approach to material, through form and function. The designers included in the network come from countries including Sweden, Thailand, the USA, Japan and Iceland. Design House Stockholm was founded in 1992 by Anders Färdig and is today one of the leading brands in Scandinavian design.
