

## Piro series

Designed by Michael H. Nielsen, Denmark

---

Piro was designed with the aspiration to create a table as the natural gathering place for family and friends, using only the finest natural materials – solid marble and oak. The carefully selected wood ensures perfect grain patterns, to provide the design with a serene look. Following classic design principles, the conical column firmly rests on the floor with a substantial marble base, visually anchoring the table for stability and calm. A table to last for generations.

### Meet the designer

My style is characterized by keeping the focus on the detail and "edge" that separates my designs from the crowd. One of my biggest influences is to register how much diversity there is among people and try to meet the very different needs that it creates. I've always been fascinated by the craftsmanship and the interaction between craftsman and designer. Good design is what gives meaning and value to the people who use it.
